Scaffolding: What, Why, How

What the child can do in cooperation today, he[she] can do alone tomorrow. Therefore the only good kind of instruction is that which marches ahead of development and leads it . . . (Vygotsky, 1986, p. 188; as cited in Wink & Putney, 2002, p. 85).

Session Description:
Scaffolding in all content areas for all students is required of all teachers today. The purpose of this interactive session is to demonstrate multiple ways of scaffolding across the content areas for elementary, intermediate, and secondary students. The presenters will share diverse and unique examples of scaffolding.

Scaffolding: What is it?
Scaffolding is how we structure our strategies to make content more comprehensible for students. Scaffolding is the gradual withdrawal of the teacher’s pedagogical support when a student moves from learning in groups to independent learning and mastery.

Scaffolding: Why?
To lead the learner to her next developmental level
To make language and content comprehensible and accessible
To reduce statistics like these:
Top 5 Reasons Students drop out:
  1. Bored 47%
  2. Missed too many days (43%)
  3. Spent time with others not interested in school (42%)
  4. Too much freedom/no rules (38%)
  5. Failing (35%)
(From: Assam, A. The prepared graduate: Why students drop out. April 2007 | Volume 64 | Number 7, pps. 91-93)

Scaffolding: The Historical Context
Wood, Bruner, and Ross (1976) coined the term when they wrote about a tutor who was interacting with child and a wooden puzzle of a pyramid. Wood et al state that the two are working on “a ‘scaffolding’ process that enables a child or novice to solve a problem, carry out a task or achieve a goal, which would beyond his unassisted efforts . . .” (p. 90).
http://stanford.academia.edu/RoyPea/Papers/109079/The_Social_and_Technological_Dimensions_of_Scaffolding_and_Related_Theoretical_Concepts_for_Learning_Education_and_Human_Activity
Scaffolding originated with Vygotsky’s notion of the Zone of Proximal Development (ZPD).

What is the ZPD?

...the distance between the actual developmental level as determined by independent problem solving and the level of potential development as determined through problem solving under adult guidance or in collaboration with more capable peers (Vygotsky, 1986, p. 86; as cited in Wink and Putney, 2002, p. 86)

Many think of scaffolding in the construction business, but it is now almost a prerequisite skill for all teachers. It is particularly effective with students who are in the process of acquiring a new language.

Scaffolding: How

Scaffolding involves teachers planning to front-load the pedagogical supports with a gradual and planned pull-back of these supports, as students move from learning collaboratively to demonstrating their new knowledge independently.

An archetypal format:

The teacher will:

The class will:

The individual will:

Resource List of Scaffolding Strategies used in the Activity Centers:

- Story Boards
- Cloze procedure
- Pull in prior knowledge
- Model

Key vocab: Simplify and extend
Sequencing of strategies and content
Visuals
Technology As the More Capable Peer
Create a problem-solving task for whole group
Create a problem-solving task for small group
Create a problem-solving task for individual

Content Areas:

<table>
<thead>
<tr>
<th>Math: Journals</th>
<th>Social Studies: Venn Diagram</th>
<th>Language Arts:</th>
</tr>
</thead>
<tbody>
<tr>
<td>terms used in lesson</td>
<td>connect history to present day example through current events in paper or on news.</td>
<td>Prompts for listening, speaking, reading or writing – students research, create &amp; present</td>
</tr>
<tr>
<td>students define, draw, explain, and provide another example in L1 or L2</td>
<td>Art: Demonstrate, interpret, Show in another medium - Students describe their work in L1 or L2</td>
<td>PE: Without words - model activity having students replicate movements showing small groups how to do it</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Science: Model</th>
<th>Other:</th>
</tr>
</thead>
<tbody>
<tr>
<td>students replicate, explain in own terms, teach another using graphic organizer</td>
<td>Other:</td>
</tr>
</tbody>
</table>

| Music: I do We do You do - Sing/Play piece, students repeat as a group, then add parts, put together whole piece | Other: |
