Dear TESOL 2002 Friends,

Forgive me for not posting the two activities you requested immediately after the TESOL convention in Salt Lake City.

Thank you for being such wonderful participants at our presentation, *Visually Vygotsky*. The purpose of this presentation was to provide access to the seemingly abstract ideas of Vygotsky through creative visualization. We appreciate all of the new metaphors and conceptualizations which you shared with us during the interactive presentation.

At the end of our presentation, we decided that I would post, in addition to all of the other graphics, two new activities for your use. The two activities were (a) New Words - New Friends; and (b) Card Categories.

Please download the activities and enjoy/adapt/adopt based on the needs of the students in your classes. Any feedback from you is always very welcome.

Thanks,

Joan
